

CONSUL GENERAL OF THE REPUBLIC OF INDONESIA
TORONTO

14 September 2020

Letter of Recommendation

Kelucung Project

Kelucung Project is the project located in Tabanan-Bali, Indonesia and run by Eco Social Solution, a non-Government Organization in Canada. The Project is aimed at building a research center to empower community in reaching their sustainable and successful future. The goal of the project is also to develop economy of the village through sustainable hydroponic agriculture, composting, mushroom farming and local river clean up. Those facilities will also be used as an education resource centre for the village, and anyone interested in learning the project.

Since the project give benefit to the society such as provides better education, assists the community to be self-independent, as well as teach the community to reach a better future, it is important for us to support the project.

Geral Patt and Katy Bilowus are the representative of Eco Social Solution who have the important role in developing this project. They promote the project intensively and visited the Consulate to explain the detail of the project.

It is hope that the project will be an example for other villages in Bali or other part of Indonesia in creating self-sufficient villages in economy.

The Consulate General of the Republic of Indonesia in Toronto fully support Eco Social Solutions, on Kelucung Project.

Sincerely,

Leonard F. Hutabarat Ph.D.
Consul General
